

Pride Legacy Formulary

Acute Formulary (BY DRUG CATEGORY) January 2026

Notes:

Please note that the acute medication formulary applies **only** to Pride Legacy non-capitated members.

The Maximum Medical Aid Price (MMAP) is the maximum amount your medical scheme will pay for a medicine on your plan. The prices shown are based on information available as of 20 November 2025 and may change over time. If a MMAP is not available for a medicine, the Single Exit Price (SEP) will apply instead.

Members are encouraged to make use of the trade name example, so that member out-of-pocket expenses are avoided.

Quantity limitations are applied by drug category and dosage format. Quantity limitations do not apply to medication authorised as Chronic.

Chronic medication is authorised individually with each case reviewed on its own merit, in accordance with Scheme rules, managed healthcare principles and evidence based medicine. Not all chronic medication is listed on this formulary, but may be accessed via treatment algorithms on review of an application for authorisation.

| Ingredient | Trade Name Example | Drug Category Name | NAPPI Code | SEP | MMAP | Schedule |
|----------------------------------|---|--|------------|-------|-------|----------|
| 1. CENTRAL NERVOUS SYSTEM | | | | | | |
